

## **SCI PROGRAM 2026**

### **Background:**

The SCI CPTC Network's main goals are:

- to support harmonization in clinical practice of genetic counseling and testing for cancer predispositions
- to consolidate the collaboration with those members, who are Specialists offering genetic counselling and ordering testing (cf Regulation).

Due to the rapid scientific and technological progress in the genetic field, continuous education is very important. The CPTC Network propose to have, in addition to the annually basic genetic courses in Switzerland, a collaborative inter-professional case conference in order to discuss and share guidelines for an adapted management of mutation-carrier individuals and the assessment of genetic cancer risk (i.e. continuous education for regular members).

### **Event dates 2026 (from 12:15 to 13:15)**

12 January	Case discussion
02 February	Case discussion
02 March	Case discussion
13 April	Case discussion
04 May	Case discussion
01 June	Case discussion
06 July	Case discussion
07 September	Case discussion
05 October	Case discussion
02 November	Case discussion
14 December	Case discussion

4 x Webinar (Lecture) dates tbd
